Experience

Software Development Engineer - Fullstack *July 2022 – Present*
DP World - leading provider of smart logistics solutions Gurugram, Haryana

Argus

- Responsible for the development & maintenance of Internal **Smart Audit Portal** named *Argus*
- Implemented a **RAG** based **Azure OpenAI** chatbot that helps Auditors to find and reference previous Audit Reports. Used the new assistant API to generate graphs programmatically
- Migrated the project from a **VM** deployment to **Kubernetes**. Patched multiple bugs plaguing the project, increasing the **availability** of *Argus* to **99.99%**
- **Migrated** the application from Node 12 to **Node 18** and finally to **Bun**, alongside removing multiple dormant libraries from the project, thus **reducing build sizes**
- Created **UI Designs** in *Figma* for all the new features while including feedback from the stakeholders
- **Tech:** Nitro, Express, Typescript, Drizzle ORM, Postgresql, React, Tailwind, Shadcn-UI, Apache Echarts, Vite, Bun, Zod, Tanstack Query, Redux, Biomejs, Docker, Vitest, Figma

Control Tower

- Worked exclusively on the frontend of the application building **reusable components** in a team of 4 developers
- Implemented the data filtering functionality in frontend while ensuring **90% Test Coverage** criteria
- **Tech:** React, NextJS, Typescript, MUI, Jest

Technical Cofounder *Aug 2020 – June 2022*
Mathrithms Remote

- During the tenure, worked on **multiple real-world projects** in a wide variety of fields
- **Dr Reddys Labs Data Pipeline**: Worked as the lead developer in developing a web application that **validates csv, excel files** against a predefined schema and pushes the clean data into *Mongodb* while making it available to be consumed using a **Graphql API** & **Elastic Search**
- **Encome**: Developed parts of the dashboard and **integrated *smalllcase*** allowing users to connect their multiple brokerage accounts from different brokers to the portal
- **Menuhub**: Using *Figma* **designed UI** of a QR menu system intended to be used in restaurants. Developed frontend of the web application using *Vue 3* & *SCSS*
- **Trade on Port**: Designed the **User Interface** using *Figma* for a sea trading & logistics company to create and track shipments. Worked on the frontend of the web application using *Vue 3*
- **Subira**: **Led a team of 6 people** (including design team) to develop an online *PDF signing* application. Extensively used *Redux* and *Tailwind*

Software Developer Intern *June 2020*
Startoon Labs Remote

- Worked on the **landing page** of the company. Integrated *Google Analytics* & *Facebook Pixel*
- **Revamped** designs of several sections of the website using *Adobe XD*

Opensource

Leetcode Compensation | *Python*

- A leetcode forums scraper that intelligently parses through posts and creates visualisations and helps to find Software Engineer Salaries in India

Xodeforces | *Vue, Typescript, Nuxt UI, Bun*

- Browser Extension that lets the users to open a feature-rich web-based code editor in the *Codeforces* website

Others | *Typescript, Golang*

- Other small contributions to many different projects including BunJS, Wails etc

Technical Skills

Languages: TypeScript, C, Go, Postgresql, Sqlite
Tech: React, React Native, Expo, Vue, Astro, Tailwind, Node, Bun, Nitro, Vite, NextJs, Nginx, Vitest
Tools: Git, Docker, Bash, Azure Devops, Supabase
Designing: Figma, DaVinciResolve

Education

B.Tech in Computer Science & Engineering
2018-22
Indian Institute of Technology, Jodhpur
CGPA: 7.76
